Basic Self

You are a stubborn and lazy stick in the mud. You are comfort and money driven, indulgent and hooked on physical stimulants, food, chocolate and drink. You exercise too little and sell your conscience to the highest bidder. You are a stagnant cesspool. (Sun in Taurus)

Emotions and habits

You are an eccentric. Your habits are weird and you are incapable of expressing emotions. You try to compensate by being clever, mastering gadgets or knowing all the right phrases, but the truth is that you haven't got a clue. You are a freak. Your emotions are a total freeze. (Moon in Aquarius)

Mind

You are impatient and impulsive - an expert at jumping to conclusions and making poorly considered decisions. You are a bad listener, argumentative and aggressive. You always think you're right. When you really get going, you're incredibly rude and obnoxious. Please, stop to think before you talk or act! (Mercury in Aries)

Love

When God handed out manners, you were left out. Rude, impolite and crude, are just a few words that describe your social skills. And the sex: rough, hot and wild, when you are not out there hunting for a new conquest. In other words: you can't get it up unless you are faced with a challenge. Pretty sick, ain't it? (Venus in Aries)

Work

You are always running around, wasting your energy, dealing with 100 tasks at once. The result is a mess of broken promises, unexecuted ideas and unfinished projects. If you want to be productive and really do something, make a list of priorities. You can always hope for miracles. (Mars in Gemini)
